Subject: 4 more suicide-related things in Paxil group

I talked to Karen and she talked to David Carpenter.

FDA made each company go line by line through absolutely all documentation of all kids in all their studies. This is where 4 more subjects in our joint study fell out, unfortunately all in the Paxil group. Don't know severity or more information about this yet. Don't know when Dave Carpenter got this information or when they released it to others.
